MISSION
To facilitate smooth and effective transition for eligible children and families. The intent of this agreement is to integrate the activities that promote the delivery of services in a timely manner in compliance with federal and state laws and regulations.

PURPOSE
The purpose of this agreement is to facilitate the integration and coordination of services to children (ages birth to 5) who are at risk for a developmental delay or have been identified as having a disability. Further, it is the purpose of this agreement to create a service system flexible enough to meet the needs of children and families within available resources. Through interagency planning and family involvement, it is our goal to help children and families transition, adjust to, and experience success in all settings.

OBJECTIVES
1. Assure that any children with suspected disabilities and children with, or at risk, for developmental delays are identified as early as possible and refer to the appropriate agency(ies).
2. Assure that children with disabilities and children with, or at risk, for developmental delays as defined by the Individuals with Disabilities Education Act (IDEA) and the Head Start Disability Services Performance Standards receive appropriate and necessary services.
3. Maximize education, health, and developmental outcomes for families whose children have special needs.
4. Support families to be equal partners and informed decision makers in the education and transition process.
5. Provide successful transitions between, among, and within agencies.
6. Provide services that are culturally relevant and linguistically appropriate.
7. Assure that the privacy requirements for handling confidential and private child and family information contained in HIPPA (Health Insurance Portability and Accountability Act) and FERPA (Family Educational Rights and Privacy Act) are followed.

- Part B team conducts initial comprehensive evaluation process in all areas of suspected disability

6.31.2.10
E. Procedural requirements for the assessment and evaluation of culturally and linguistically diverse children.

1. Each public agency must ensure that tests and other evaluation materials used to assess children are selected, provided, and administered so as not to be discriminatory on a racial or cultural basis and are provided and administered in the child’s native language or other modes of communication, such as American Sign Language, and in the form most likely to yield accurate information on what the child knows and can do academically, developmentally, and functionally, unless it is clearly not feasible to select, provide, or administer pursuant to 34 CFR Sec.300.304(c)(1).

2. Each public agency must ensure that selected assessments and measures are valid and reliable and are administered in accordance with instructions provided by the assessment producer and are administered by trained knowledgeable personnel.

3. Each public agency must consider information about a child’s language proficiency in determining how to conduct the evaluation of the child to prevent misidentification. A child may not be determined to be a child with a disability if the determinant factor for that eligibility determination is limited English proficiency. Comparing academic achievement results with grade level peers in the public agency with similar cultural and linguistic backgrounds should guide this determination process and ensure that the child is exhibiting the characteristics of a disability and not merely language difference in accordance with 34 CFR Sec. 300.306(b)(1).

4. Each public agency must ensure that the child is assessed in all areas related to the suspected disability.

5. Policies for public agency selection of assessment instruments include:
   (a) Assessment and evaluation materials that are tailored to assess specific areas of educational need; and
   (b) Assessments that are selected ensure that results accurately reflect the child’s aptitude or achievement level.

6. Public agencies in New Mexico shall devote particular attention to the foregoing requirements in light of the state’s cultural and linguistic diversity. Persons assessing culturally or linguistically diverse children shall consult appropriate professional standards to ensure that their evaluations are not discriminatory and should include appropriate references to such standards and concerns in their written reports.

6.31.2.11 (A)(3)
To ensure effective transitioning from IDEA Part C programs to IDEA Part B programs, each public agency must conduct a full and individual initial comprehensive evaluation at no cost to the parent and in compliance with requirements of 34 CFR Secs. 300.300, 300.301, 300.302, 300.304 and 300.305 and other department rules and standards before the initial provision of Part B special education and related services to a child with a disability. (a) The initial comprehensive evaluation process shall be conducted in all areas of suspected disability.
If a parent does not consent to the Part B evaluation and eligibility determination, the EI Service Coordinator will provide them with Prior Written Notice that Part C services will end at the time of their child’s third birthday.

The FIT Family Service Coordinator will also provide the family a copy of their procedural safeguards at this time.

Attachment to Transition Team MOU

NAPPR Tribal Home Visiting Program and NM Parents As Teachers (PAT) Program

What is Home Visiting?

The Maternal, Infant, and Early Childhood Home Visiting Program gives pregnant women and families, particularly those considered at-risk, necessary resources, and skills to raise children who are physically, socially, and emotionally healthy and ready to learn.

What are the goals of the program?

From birth to kindergarten entry, MCHB, in partnership with the Administration for Children and Families (ACF), funds states, territories, and tribal entities to develop and implement evidence-based, voluntary programs that best meet the needs of their communities. Goals for every program are to:

- Improve maternal and child health
- Prevent child abuse and neglect
- Encourage positive parenting
- Promote child development and school readiness

What does the program do for participants?

By electing to participate in local home visiting programs, families receive help from health, social service, and child development professionals. Through regular, planned home visits, parents learn how to improve their family’s health and provide better opportunities for their children. Home visits may include:

- Supporting preventative health and prenatal practices
- Assisting mothers on how best to breastfeed and care for their babies
- Helping parents understand child development milestones and behaviors
- Promoting parents’ use of praise and other positive parenting techniques
- Working with mothers to set goals for the future, continue their education, and find employment and child care solutions.
