

REACH Telehealth Network
Early Intervention Seminar Series
presents

**Sensory, Behavioral and Environmental
Impacts Affecting Feeding**

May 20, 2005

11:30 a.m. – 1:00 p.m.

Speaker: Nancy C. Rasch, OTR/L BCP, Senior Program Therapist for the Early Childhood Evaluation Program, Center for Development and Disability

Locations: Las Cruces, Lordsburg, Roswell, Alamogordo, Albuquerque, Carlsbad

Registration: To participate in this teleconference training, please contact your site coordinator by May 13th, or you may email or call Shawne Riley at REACH by May 13th so that we can confirm the training site and provide you with handouts for the training.

REACHCDD@salud.unm.edu (505) 272-3844

Objectives: The participant will gain knowledge in the:

- a) Behavioral, sensory and environmental issues compounding difficulties with feeding.
- b) Use of systematic desensitization in your approach to children who have feeding difficulties.
- c) Assessment of the components of interaction and behavior and sensory processing that appear in specific types of problems encountered in disordered feeding.

Acknowledgement: This event is grant supported by the Office of the Advancement of Telehealth, HRSA.
