Family Training on Autism Spectrum Disorder (ASD)  
‘You’re the Expert’

Supporting Individuals with ASD in the Community

Given our current circumstances and the format we need to use for everyone’s safety, we now invite you to four evening meetings by Zoom. If you are unfamiliar with using Zoom, let us know and we can provide assistance prior to the meeting.

This training is specifically designed for family members. When family members register they can include one community member or professional with their registration. It is important for community members/professionals attending to understand that the content is specific for family members. There is no charge to attend, Hearts for Autism and NM Department of Health are sponsoring this training.

Training Objectives:

- Participants will match at least one challenge they have noticed for their family member or friend to characteristics of ASD.

- Participants will generate ideas of how to support individuals with ASD in family and community life.

**May 5, 12, 19 & 26th from 7-8 pm**
You will receive a link to attend the Zoom training when you register. Please register early.

Presented by:  Marci Laurel, MA, CCC—SLP  
Maryann Trott, MA, BCBA
